AIR CARE+ TECHNOLOGY

Available in a variety of fragrances, Pink Zebra's Air Care+ Odor Neutralizing Collection features a performance-driven technology that combats stubborn malodors, eliminating and neutralizing odors instead of just masking them. The ingredients combine with common malodors, such as smoke, pet and kitchen odors on a molecular level. The new combined molecule triggers nose receptors that relate to pleasant odors instead of the original bad odor.

Pink Zebra fragrance products contain a thoughtful blend of professionally created ingredients enhanced by essential and natural oils.
